

FIG. 1

FIG. 2

FIG. 2 is a detailed cross-sectional view of a mechanical device, likely a pump or valve assembly. The device features a central vertical shaft (11) passing through a housing (1). The shaft is connected to a central piston or plunger (15) which moves within a cylinder (16). The cylinder is surrounded by a series of seals and rings (12, 13, 14, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35). The device is shown in a cross-section with various components labeled with numbers 1 through 35. The top part of the device has a flange (6) and a cap (7A). The bottom part of the device has a base (35) and a flange (34). The central shaft (11) is connected to a central piston (15) which moves within a cylinder (16). The cylinder is surrounded by a series of seals and rings (12, 13, 14, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35). The device is shown in a cross-section with various components labeled with numbers 1 through 35. The top part of the device has a flange (6) and a cap (7A). The bottom part of the device has a base (35) and a flange (34). The central shaft (11) is connected to a central piston (15) which moves within a cylinder (16). The cylinder is surrounded by a series of seals and rings (12, 13, 14, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35).
